

**TURKEY HIGHER EDUCATION QUALIFICATIONS FRAMEWORK-PROGRAM QUALIFICATIONS-BASED QUALIFICATIONS RELATIONSHIP<sup>1</sup>**

Basic Field Competencies (Health area)		PROGRAM COMPETENCIES												Turkey Higher Education Qualifications Framework (TYYÇ, Level 7, Master of Education)	
		1	2	3	4	5	6	7	8	9	10	11	12		
Information	Has, develops and deepens up-to-date knowledge at the level of expertise in the field of health based on undergraduate level qualifications	X X	X X	X X	X X	X X		X X						To be able to develop and deepen their knowledge in the same or a different field at the level of expertise based on their undergraduate level qualifications.  To be able to comprehend the interdisciplinary interaction related to the field.	Information
	Interdisciplinary health understand and use the interaction		X X		X X				X X						
	Information technologies required by the field of health, have knowledge about technical equipment and field-specific devices and tools												X		
	About statistics as a tool used continuously in the field of health studies have knowledge, use the related software effectively					X		X			X				
Skill	Uses the theoretical and practical knowledge acquired in the field of health at the level of expertise	X X	X X	X X	X X	X X		X X						To be able to use theoretical and practical knowledge at the level of expertise acquired in the field  To be able to interpret the knowledge acquired in the field by integrating the information from different disciplines and to create new information  To be able to analyze the problems encountered in the field by using research methods	Skill
	Interprets the knowledge in the field of health with the information coming from different disciplines and creates new information, makes analysis and synthesis by using different research methods and offers solutions					X X		X X							
	Write the report of his research														
	Makes the necessary examination and solves the problems and problems by using advanced technological tools and devices specific to the field and other technological tools including computer at the level required by the health field.												X		
	Uses statistical software effectively in the field, choose the correct statistical methods, calculate and interpret correctly										X X				
	Plans and makes experimental research.					X X					X X				

<sup>1</sup> Basic Field Qualifications-Program Outcomes relationship "X" Turkey Higher Education Qualifications Framework-Program Outcomes relationship with "X" is given.

	Basic Field Competencies (Health area)	PROGRAM COMPETENCIES												Turkey Higher Education Qualifications Framework (TYYÇ, Level 7, Master of Education)		
		1	2	3	4	5	6	7	8	9	10	11	12		Competence to work independently and take responsibility	Competencies
Working independently and Competence to take responsibility	Constructs fiction, offers solutions for problems requiring expertise in the field of health, solves problems, evaluates the results obtained and applies when necessary					X					X X			To be able to conduct an independent study requiring expertise in the field		
	Unforeseen in the field of health develops solutions in case of complex situations and takes responsibility		X X				X X							To be able to develop new strategic approaches to solve complex and unpredictable problems encountered in applications related to the field and to produce solutions by taking responsibility		
	Carries out studies related to health field independently and / or as a team		X		X	X			X					To be able to be able to lead in environments that require solving problems related to the field		
	Publish a scientific article in a national journal or present it in a scientific meeting					X	X				X					
	Conduct scientific clinical and / or descriptive research / presentation / publication on priority issues related to the field and community health.					X					X					

	Basic Field Competencies (Health area)	PROGRAM COMPETENCIES												Turkey Higher Education Qualifications Framework (TYYÇ, Level 7, Master of Education)		
		1	2	3	4	5	6	7	8	9	10	11	12			
Learning competence	Evaluates the information in the field of health with a critical approach and directs learning							X X		X X		X X		To be able to critically evaluate the knowledge and skills acquired in his / her field and to direct his / her learning.	Learning competence	Competencies
	Applies the principles of professional development and lifelong learning in the field of health					X				X						
	Performs statistical analysis in the level of reading and evaluating a scientific article on statistical analysis and follows the evidence-based practices and conducts researches to establish evidence in his / her field related to professional practices.				X	X				X	X X	X				

	Basic Field Competencies (Health area)	PROGRAM COMPETENCIES												Turkey Higher Education Qualifications Framework (TYYÇ, Level 7, Master of Education)		
		1	2	3	4	5	6	7	8	9	10	11	12			
Communication and Social Competence	Discuss and share his / her health knowledge, current developments and his / her studies systematically in written, oral and visual form with groups in or outside the same field.					X X					X X		X X	To be able to systematically transfer the current developments in the field and their studies to the groups in and outside the field by supporting them with quantitative and qualitative data.	Communication and Social Competences	Competencies
	Examines the social relations in the professional and professional environment and the norms that direct these relations from a critical point of view and makes necessary to improve them.								X X				X X	To be able to critically examine social relations and norms that direct these relations, to develop and to act if necessary to change		
	Communicate verbally and in writing using a foreign language at least at the B2 level of the European language portfolio												X X	To be able to communicate verbally and in writing by using a foreign language at least at the level of B2 of European Language Portfolio.		
													X X	To be able to use information and communication technologies in advanced level together with computer software required by the field		
Field Specific Competence	Interprets strategy and policy development and implementation plans in the field of health and evaluates the results in a scientific and ethical framework.				X X					X X		X		To be able to supervise and teach social, scientific, cultural and ethical values in the stages of data collection, interpretation, application and announcement in the field.	Field Specific Competence	
	Observes and teaches social, scientific and ethical values in the stages of collecting, recording, interpreting and announcing the data related to the field of health						X X			X X						
	Assimilating knowledge and problem solving in health apply his / her skills in interdisciplinary studies								X X					To be able to develop strategies, policies and implementation plans on issues related to the field and to evaluate the results within the framework of quality processes		
	Current developments in the field of health is the basic unit of society the child and the family in accordance with the national values and realities of the country			X				X								
	Develops strategies, policies and implementation plans in the field of health and evaluates the results within the framework of quality processes		X		X	X					X					To be able to use the knowledge, problem solving and / or application skills in interdisciplinary studies.
	Contributes to national and international health policy studies on health promotion								X X							
	Knows the importance of ethical principles and ethical boards for individual and society, behaves ethically						X X			X	X
